1 Corporate Information

Cameo Global Communications Private Limited (Formerly Known as STS Infotechnologies (India) Private Limited) is a subsidiary of Cameo Global Inc., USA. It was incorporated on 28th June 2005 and the Company commenced its operations from the same date. The Company is engaged in the provision of Software Consulting Services & Software Development.

2 Significant Accounting Policies

The significant accounting policies have been predominantly presented below in the order of the Accounting Standards notified under the Companies (Accounting Standards) Rules, 2006 (as amended). The Company is a Small and Medium Sized Company as defined in the General Instructions in respect of Accounting Standards notified under the Companies (Accounting Standards) Rules, 2006 (as amended). Accordingly, the Company has complied with the Accounting Standards as applicable to a Small and Medium Sized Company.

2.1 Basis of Preparation

The financial statements of the Company have been prepared in accordance with the Generally Accepted Accounting Principles in India ("Indian GAAP") on accrual basis. Indian GAAP comprises mandatory accounting standards as prescribed under section 133 of the Companies Act, 2013 read with Rule-7 of the Companies (Accounts) Rules, 2014. Accounting policies have been consistently applied except, where a newly issued accounting standard is adopted for the first time or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

2.2 Use of Estimates

The preparation of the financial statements in conformity with Indian GAAP requires the Management to make estimates and assumptions considered in the reported amounts of assets and liabilities (including contingent liabilities) and the reported income and expenses during the year. The Management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Future results could differ due to these estimates and the differences between the actual results and the estimates are recognised in the periods in which the results are known / materialise.

2.3 Cash and cash equivalents (for purposes of Cash Flow Statement)

Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

2.4 Cash flow statement

Cash flows are reported using the indirect method, whereby profit / (loss) before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

2.5 Revenue Recognition

Income from services- Revenue from Information Technology enabled services (ITES) is recognized as per service agreement entered into with the customers.

2.6 Other Income

Interest income is accounted on accrual basis.

[Handwritten signatures]

2.7 Property, Plant and Equipment

- a) Property, Plant and Equipment are stated at cost less accumulated depreciation less accumulated impairment, if any. Cost comprises purchase price and other costs directly attributable to bringing the assets to their present location and working condition for their intended use.
- b) Property, Plant and Equipment are tested for impairment and assets which are not expected to generate any future cash flows are stated at their Net Realizable Value.

c) Useful life of the assets are as follows:

	Years
Computers	3 years
Air conditioners	5 years
Office Equipments	5 years
Motor Vehicles	6 years
Leasehold improvements	5 years

2.8 Impairment

At each balance sheet date, the Company assesses whether there is any indication that any property, plant and equipment and intangible assets with finite lives may be impaired. If any such impairment exists the recoverable amount of an asset is estimated to determine the extent of impairment, if any. Where it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. Recoverable amount is the higher of fair value less costs to sell and value in use. If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in the statement of Profit and Loss.

2.9 Depreciation

- a) The Company has provided depreciation on the Property, Plant and Equipment on Straight Line Method (SLM) at useful lives mentioned in Schedule II to the Companies Act, 2013.
- b) Depreciation on Property, Plant and Equipment is calculated on pro-rata basis with reference to the date on which the asset is put to use or disposed.
- c) Leasehold improvements are depreciated over lock in period of lease

2.10 Foreign Currency Transactions

All transactions in foreign currency are recorded on the basis of the exchange rate prevailing as at the date of transaction. The difference, if any, on actual payment / realization is dealt in the profit & loss account. Monetary assets and liabilities denominated in foreign currency are restated at rates prevailing at the year-end. The net loss or gain arising out of such conversion is dealt in the profit & loss account.

2.11 Investments

Long-term investments (excluding investment properties), are carried individually at cost less provision for diminution, other than temporary, in the value of such investments. Current investments are carried individually, at the lower of cost and fair value. Cost of investments include acquisition charges such as brokerage, fees and duties. Investment properties are carried individually at cost less accumulated depreciation and impairment, if any. Investment properties are capitalised and depreciated (where applicable) in accordance with the policy stated for Tangible Assets. Impairment of investment property is determined in accordance with the policy stated for Impairment of Assets.

Handwritten signature/initials: CR

2.12 Employee Benefits

Employee benefits include provident fund, superannuation fund, gratuity fund, compensated absences, long service awards and post-employment medical benefits.

Defined contribution plans

The Company's contribution to provident fund and employee's state insurance are considered as defined contribution plans and are charged as an expense in the profit and loss during the period in which the employee renders the service, as they fall due based on the amount of contribution required to be made.

Defined benefit plans

For defined benefit plans in the form of gratuity fund and post-employment medical benefits, the cost of providing benefits is determined using the Projected Unit Credit method, with actuarial valuations being carried out at each Balance Sheet date. Actuarial gains and losses are recognised in the Statement of Profit and Loss in the period in which they occur. Past service cost is recognised immediately to the extent that the benefits are already vested and otherwise is amortised on a straight-line basis over the average period until the benefits become vested. The retirement benefit obligation recognised in the balance sheet represents the present value of the defined benefit obligation as adjusted for unrecognised past service cost, as reduced by the fair value of scheme assets. Any asset resulting from this calculation is limited to past service cost, plus the present value of available refunds and reductions in future contributions to the schemes.

2.13 Borrowing costs

Borrowing costs include interest, amortisation of ancillary costs incurred and exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost. Costs in connection with the borrowing of funds to the extent not directly related to the acquisition of qualifying assets are charged to the Statement of Profit and Loss over the tenure of the loan. Borrowing costs, allocated to and utilised for qualifying assets, pertaining to the period from commencement of activities relating to construction / development of the qualifying asset upto the date of capitalisation of such asset is added to the cost of the assets. Capitalisation of borrowing costs is suspended and charged to the Statement of Profit and Loss during extended periods when active development activity on the qualifying assets is interrupted.

2.14 Leases

Where the Company as a lessor leases assets under finance leases, such amounts are recognised as receivables at an amount equal to the net investment in the lease and the finance income is recognised based on a constant rate of return on the outstanding net investment.

Assets leased by the Company in its capacity as lessee where substantially all the risks and rewards of ownership vest in the Company are classified as finance leases. Such leases are capitalised at the inception of the lease at the lower of the fair value and the present value of the minimum lease payments and a liability is created for an equivalent amount. Each lease rental paid is allocated between the liability and the interest cost so as to obtain a constant periodic rate of interest on the outstanding liability for each year.

2.15 Earnings per share

Basic earnings per share is computed by dividing the profit / (loss) after tax (including the post tax effect of extraordinary items, if any) by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the profit / (loss) after tax (including the post tax effect of extraordinary items, if any) as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date. The dilutive potential equity shares are adjusted for the proceeds receivable had the

2.16 Tax On Income

The Current charge for income tax is based on the tax liability computed as per the Income Tax Act 1961.

Handwritten signature/initials.

2.17 Provisions And Contingent Liability:

A provision is recognized when the company has a present obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation, and in respect of which a reliable estimate can be made. Provisions are not discounted to present value and are determined based on the best estimate as at the balance sheet date, required to settle the obligation. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates.

2.18 Business Transfer Agreement

The company uses the purchase method of accounting to account for transfer of business undertaking made during the year as a part of business combination.

The Company determines that it has acquired a business undertaking, as a going concern on slump sale basis, when the acquired set of activities and assets include an input and a substantive process that together significantly contribute to the ability to create outputs. The acquired process is considered substantive if it is critical to the ability to continue producing outputs, and the inputs acquired include an organised workforce with the necessary skills, knowledge, or experience to perform that process or it significantly contributes to the ability to continue producing outputs and is considered unique or scarce or cannot be replaced without significant cost, effort, or delay in the ability to continue producing outputs. When the Company acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date.

Transfer date is determined to be the effective date as per the business transfer agreement.

Under this slump sale transaction, the excess consideration paid over the book value of the net assets transferred is recognised as goodwill. It represents a payment made in anticipation of future income. Goodwill is initially measured at cost and it is considered appropriate to amortise goodwill over a period of five years.

In case of purchase method, the company incorporated the assets and liabilities at their existing carrying amounts. No adjustment is made to reflect the fair value of assets and liabilities or to allocate the consideration to individual identifiable assets and liabilities on the date of transfer.

Transaction costs that the Company incurs in connection with a business combination such as stamp duty, legal fees, registration charges, and other professional and consulting fees are expensed as incurred.

22 Business Transfer Agreement

During the FY 22-23, Cameo Global Communications Private Limited (Purchaser) entered into a Business Transfer Agreement (BTA) dated 7th April 2023, with Aptude Software Solutions India Private Limited (seller), where the purchaser has taken over the business undertaking, as a going concern on a slump sale basis effective date of the transaction being 1st April 2023, for a sale consideration of INR 300 lakhs, in accordance with terms and conditions outlined in BTA.

Details of the arrangement including accounting treatment has been explained below.

Business Transfer of Aptude Software Solutions India Private Limited to Cameo Global Communications Private Limited

Salient features of the Business Transfer Agreement

Salient features of the Business Transfer Agreement is as follows:

- (i) With effect from the Effective Date, all of the Seller's right, title and interest in, to and under the Business Assets, free and clear of all Encumbrances shall be transferred to the company. All the Business assets including loans, advances, deposits, rights, quotas, entitlements, allotments, concessions, exemptions, liberties, advantages, easements, tenancies, privileges, Movable Property, Business IPR and Net working capital shall stand vested with the purchaser.
- (ii) Upon successful consummation of Closing in accordance with this Agreement, all income, revenue and, or, profit accruing from the Business Assets on and from the Effective Date shall belong to the company, and all costs and expenses arising in connection with the Business Assets on and from the Effective Date shall be borne and paid by the company.
- (iii) The company is liable for and shall pay and discharge all of the Business Liabilities in accordance with their respective terms on and from the Effective Date. Business liabilities include Assumed Employee Liabilities and the liabilities of the Seller pertaining to the Business Undertaking set out in the Management Accounts. The company is not liable for any liability other than business liability.
- (iv) the Business Employees of the seller become employees of the purchaser with effect from the Effective Date as per the conditions set out in BTA.
- (v) Lump sum consideration of INR 300 lakhs is paid by the company to the Seller as slump sale consideration for sale and transfer of the Business Undertaking.

Accounting treatment in the books of the Company

On the Scheme becoming effective on 01 April 2022 ("Effective Date"), the Company has accounted for the business transfer in accordance with "Purchase method". Accordingly, as per the purchase method accounting, following steps are followed.

- (i) The Company has recorded the assets and liabilities transferred at their respective carrying values as appearing on transfer date.
- (ii) The consideration for the business transferred has been discharged by cash.
- (iii) No adjustment is made to the book values of the assets and liabilities of the seller company when they are incorporated in our financial statements.
- (iv) The excess consideration paid over the book value of the assets and liabilities transferred is considered as goodwill. The same is measured at cost and amortised over a period of five years.

22 Composite scheme of arrangement (continued)

Hence, based on above mentioned scheme features, accounting treatment in the Balance sheet as at 31 March 2023 for giving effect of this business transfer are mentioned in the below table.

28. Transfer Pricing

Management believes that the Company's international transactions with related parties post 31 March 2023 (last period up to which an Accountants' report has been submitted as required under the Income tax Act, 1961) continue to be at arm's length and that the transfer pricing legislation will not have any impact on these financial statements, particularly on the amount of tax expense and that of provision for taxation.

29. External confirmations and Reconciliations

Trade receivables and trade payables forming part of financial statements are subject to confirmation as at the end of the financial year.

30. Figures are rounded off to nearest thousands.

31. The figures of the previous year have been regrouped and reclassified wherever necessary.
